

## Complete IPTV Solution

### Description :

Our solutions are designed to provide IPTV and VOD in deployments ranging from up to 1000 users, such as for the hospitality industry, or up to 10,000 users such as for telecom operators. For smaller deployments of up to 1000 users, our solutions comprises of the MTS IPTV 4X device, which also has an internal 1 TB of HDD storage for video content of more than 300 movies in DVD quality, IPTV Billing system, all integrated and ready to install. The solution allows an easy and cost-effective deployment of an IPTV system that caters for hotels, business centres, educational institutions, hospitals, yachts, housing compounds, residential towers, etc...

For hotels, the system can be easily integrated with the hotel property management system, such as MICROS-Fidelio, providing welcome messages, hotel information page, hotel bill view, messaging, express checkout, room status change and much more.
